# Vibrant

**"energetic, bright, and full of life or excitement"**

At BMI Coverland we believe that a roof is never just a roof. It is a home, a place to create memories and where dreams come true. But it also gives protection and shelter. Using the latest technology, we go above and beyond to design industry leading roofing solutions. We're constantly innovating to bring you beautiful tiles that are both affordable and eco-conscious. Our new Vibrant concrete tile range delivers on both aesthetics and longevity.

Our unique low-VOC coating applied during manufacturing, bonds with the tile and through its VibeTech Technology delivers deep, rich colours, and colour uniformity across the roof. In addition, our EffloBlock technology ensures no efflorescence appears after installation delivering a world class look to your development.

When taking the overall installation cost into consideration, our concrete roof tiles are cost effective when compared to other roofing options, quicker to install and easier to maintain. We believe so strongly in the quality of our product that we offer an industry leading 30 year roof tile guarantee.

## BENEFITS OF THE VIBRANT RANGE

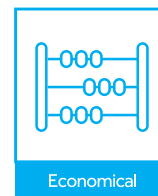

VibeTech

- **Uniform colour** across the roof
- Deeper **richer colour**
- A coating that is **applied during manufacturing**

EffloBlock

- Our EffloBlock technology **ensures no efflorescence appears** post installation\*\*\*

Economical

- **Cost effective** vs other roofing materials\*\*
- **Quicker to install**
- Easy to maintain
- Readily available
- **30 year guarantee**

\*\*\*Perennial efflorescence is often seen as colour variation. It is a natural occurrence with concrete products and will wash away with a few rainy seasons. It poses no harm when washing off from the roof.

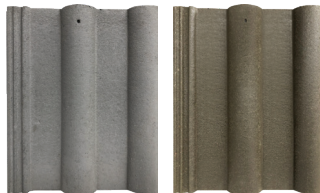

## SECURE YOUR ROOF

BMI Coverland offers quick and easy to install storm clips and nails for fast and professional securing of concrete tiles. Our clips match the respective tile profiles exactly to provide reliable and durable protection against wind upliftment and slipping with an added security benefit against intruders entering the roof. See our Technical Guide for your area's specifications.

DISCLAIMER: The colour of these illustrations may vary due to the printing process. BMI Coverland recommends that you view actual tile samples before reaching a purchase decision. **30 year roof tile guarantee:** T's & C's apply. \*Trademark pending for Vibrant, VibeTech and EffloBlock. \*\*Based on comparative research done on roof tiles vs metal roof installations. For more information please contact your sales representative or email us at [info.sa@bmigroup.com](mailto:info.sa@bmigroup.com)

The Vibrant range is available in Double Roman and Taunus tile profiles in the following colours, Slate Grey, Red, Terracotta and Brown on a made to order basis. Please consult with your local sales team for availability.

### GOOD ROOFING PRACTICE

#### Very important:

1. Our Vibrant tiles are coated and **rough handling could result in scuffing or scratching of the surface**. Care should be taken when handling and installing the products.
2. **We recommend that tiles are cut on the ground and not on the roof** as dust can settle on the coating which will require cleaning afterwards to remove the dust. Abrasive and or chemical cleaning methods will affect the coating. Hot bits of the tiles being cut on the roof which then fall onto other tiles, can potentially burn into the coating which then cannot be removed. This will affect the intended appearance of the tiles.
3. The BMI Coverland dry ridge system is recommended for ridge and hip applications to deliver a clean and professional appearance to the roof which is easier to maintain than traditional mortar bedding that cracks.

A lot can change in 30 years, but your roof doesn't have to. With a track record of just over 70 years and the backing of BMI Technical Centre, we are proud to introduce our **30 Year Roof Tile Guarantee**.

Your roof is your protection from the elements, your shelter and with our guarantee, your peace of mind. Our concrete range is guaranteed against the event of damage to the weather resistance of the product resulting from a manufacturing defect. In the unlikely event that damage occurs, BMI Coverland will repair the affected product for the lifetime of the guarantee.

### #itsneverjustarroof

### INTENSE PRODUCT TESTING

Our roofing products are tested in a wind tunnel unique to the industry, simulating wind and rain conditions found in a wide range of climate zones worldwide, including situations which typically arise only every 50 years. BMI only releases the new roofing materials when all trials as well as several hardness and long-term ageing tests have been successful.
